

Attached is the lab requisition for your child's COVID-19 test. Also attached are the instructions to schedule your child's test with Memorial Hermann Urgent Care.

It is also important to remember that a negative test does not end the 14-day quarantine period if you have an exposure to a COVID-19 positive person. If your child is positive for COVID-19 or are exhibiting any symptoms please see below link to find out when it is safe to be around others.
