Re: Post-partum Depression questionnaire and Adolescent questionnaire

At the appropriate WCC visits, post-partum depression questionnaires and adolescent questionnaires are given to parents to fill out. We typically bill out for these completed questionnaires at the visit. At this time, most questionnaires are not covered and do not pay out separately by the insurance company. It is either mutually exclusive to the well visit or not a covered procedure and go to patient responsibility.

If the questionnaire is not covered by the insurance company or patient is self-pay, we will not bill the patient for these questionnaires.

If parents are hesitant to fill out a questionnaire out of concern that they will be charged, please let them know that the charges will not be passed onto them if it is not covered.
