This week the managers, along with Drs. Jung and Pielop reviewed all current COVID protocols and have come up with the following plan to roll back or discontinue the following protocols.

1. **May 12, 2021** Triage question will change to "Is anyone in your household currently under isolation or quarantine for COVID-19?"
2. **June 1, 2021**
 - a. All offices will return to the 12-1:20pm lunchtime.
 - b. All offices will open back up for visitors. e.g.: 2 parents, drug reps, students.
3. **September 1, 2021**
 - a. Separation of sick and well visits until 9/1/21. On 9/1/21, we will return to the pre- COVID schedule. Currently, sick visits may be scheduled in the morning as long as the patient does not appear ill or have "distracting" symptoms. e.g.: coughing, vomiting. A parent should look at another patient in the waiting room and assume they are also here for a wcc.
 - b. Current well visits were scheduled with the promise that we have separated sick and well, which is why we want to continue to separate them.
4. We will continue daily staff screening until the community rates have lowered. Please make sure you continue to complete the screening and check your temperature each work day when you arrive.
5. The COVID tab on our website will be combed through and updated with all current Blue Fish policies on Wednesday May 5, 2021.
6. The student and employee symptom decision tree and the covid return to school note have been updated with changes due to COVID vaccines. The return to play section has been updated on the back of the covid return to school note.
7. Reminder- All doctor meeting 9/12/21 at 2pm. We encourage everyone to attend in person if possible.
