

Memo

To: All staff and physicians
From: Management
Date: 6/21/21
Re: Employee screening

We will no longer require staff members who are fully vaccinated against COVID-19 to log their temperature and symptoms daily. They are still required to report any symptoms to their supervisors, who will then report the symptoms to Lavella or Lindsay to determine if they should be tested.

All staff members who are not fully vaccinated against COVID-19 will be required to continue to log their temperature and symptoms daily and report any possible exposure to their supervisor.
