Re: Christmas Party

The 2021 Blue Fish Christmas party will be the first large gathering we have hosted since the start of the COVID-19 pandemic. We have extended the invite to all significant others. In order to keep the environment safe for all those attending we are requiring everyone attending to be fully vaccinated with their second dose of the Pfizer vaccine or one dose of the Janssen vaccine no later than November 27, 2021. All significant others are required to provide a photo copy of their COVID-19 vaccine shot record to the office manager by December 1, 2021.

If you or your significant other do not wish to get vaccinated, then an antibody test showing immunity between now and December 1, 2021 is necessary to attend. If this cannot be obtained, then a negative COVID PCR test is required and must be swabbed for within 3 days of the party in order to attend. These results must be forwarded to your office manager 24 hours prior to the party.

This criterion may change based on the state of the pandemic at the time of the Christmas party.
