

# Memo

**To:** Doctors and MAs  
**From:** Management  
**Date:** February 17, 2022  
**Re:** COVID-19 vaccine waiting period update

---

Previously there was a 90day waiting period to receive a COVID-19 vaccine after receiving monoclonal antibodies.

CDC updated this information on 2/11/2022. Below is the statement CDC released.

“People who previously received antibody products (anti-SARS-CoV-2 monoclonal antibodies) as part of COVID-19 treatment, post-exposure prophylaxis, or pre-exposure prophylaxis can be vaccinated at any time; COVID-19 vaccination does not need to be delayed following receipt of monoclonal antibodies.”
