Re: Masking Update

Starting with the beginning of the work day on April 20th, 2022, masks will no longer be required full time. However, in the following situations, we ask that you still wear a mask.

1. If you encounter a patient who is wearing a mask, please wear a mask with them.
2. If you have URI symptoms, please wear a mask until you are no longer showing symptoms that are distracting to patients or fellow co-workers.
3. If you are entering a patient room to do a procedure such as a nasal swab, please wear a mask.
