Ophthalmology	832-227-1600		

How the Referrals Process Works for You

1. Please choose a specialist from our list.
2. The office referrals coordinator will email you within 24 hours to see which specialist you would like to see.
3. Once the coordinator receives a response email from you, they will process and needed insurance prior authorizations, complete all necessary forms, and fax all required document to the specialist's office.
4. Please give our office a week to complete these steps.
5. An email will be sent to you once the referral has processed to inform you on whether the specialist office will call you or if you need to call them to schedule an appointment.
6. If you have any questions about your referral during this time, please feel free to contact us at 713-467-1741 ext. 4 and ask for the Referrals Coordinator.
